# Thomas Husom

Oracle Database Developer - Building with AI · [honesttom.ai](https://honesttom.ai)  
Aberdeen, South Dakota, United States

## Summary

Resume <https://honesttom.ai/resume.html> How I Work <https://tomhusom-sudo.github.io/howIwork.html> AI coding Project [honesttom.ai](https://honesttom.ai) Senior Oracle Database Administrator, Developer and Manager with 20+ years of experience in high-availability Linux/Unix environments. Expert in Oracle versions 7 through 19c, specializing in large-scale migrations, ETL integration, and HIPAA-compliant data architecture. Proven leader with 5 years of experience managing teams of 6+ DBAs and Analysts. Worked as an Oracle Developer in Agile/SCRUM environments. Work with AWS cloud services and Linux/Redhat and Windows/Sql Server staging systems. Currently expanding expertise in modern AI-assisted development, including agentic coding workflows using Claude Code and autonomous agent frameworks, applying deep database and ETL expertise to next-generation data and analytics projects. Claude Code + Agentic CLI + Gemini CLI Building full production web applications end-to-end using Claude Code workflows — from zero to deployed in a single session. Multi-file edits, git pushes, live CORS API integrations, all orchestrated autonomously. Currently excited to be working with teams of AI agents — multiple Claude instances working in parallel on my codebase like a dev team. Super Cool! Current project I am running gstack, Claude Code, live data APIs, GitHub Pages. Added Gemini CLI to diversify and for extra tokens. See current AI Project Dashboard, How I Work and Resume. <https://tomhusom-sudo.github.io/https://tomhusom-sudo.github.io/dashboard.html>
